

Starburst Tree Silver Centerpiece

By: Kathleen George for STYROFOAM Brand Foam

Make a beautiful centerpiece with a starburst tree. In four easy steps you can have a great Christmas craft to show all your guests.

Materials:

STYROFOAM* Brand Products:

Balls, 1-1/2", 17 - 20

Glitter spray, silver (read label to be sure it's foam-safe)

Toothpicks, 50 per ball

Curling ribbon, silver

Spray paint, silver (read label to be sure it's foam-safe)

Star garland, silver

Miniature glass ornaments, 12 - 14

Thick, white craft glue

Steps:

1. To make starburst ornaments, dip one end of each toothpick in glue and insert 3/8" - 1/2" deep into foam ball; you'll need approximately 50 toothpicks per ball.
2. Spray paint starbursts silver; let dry. Spray starbursts with glitter spray.
3. Arrange eight starbursts in a circle; arrange five starbursts in second layer, pressing toothpicks gently into the first layer for stability. Repeat, adding three starbursts for the third layer. Top tree with single starburst. (Depending on the size of your starbursts, and the size tree you'd like, you may choose to add additional starbursts.)
4. Decorate tree: loosely wrap star garland around tree; curl strands of curling ribbon and place on tree; hang mini glass ornaments from toothpicks.
